Professional Summary

Final-year B.Tech ISE student (2026) who interned at Cognizant as a Quality Engineer, working on Java-based test automation with Selenium, TestNG, and Cucumber. Alongside that, I've independently built projects like a conversational AI platform for natural language SQL and a personal knowledge agent using RAG and vector search. I like working close to both the code and the user, which is probably why I ended up doing both QA and full-stack AI work.

Skills

Languages: Python, Java, JavaScript, C
Frameworks: React.js, Node.js, TestNG, Cucumber
AI & LLM: RAG Pipelines, Prompt Engineering, Agentic Workflows, LLM Integration, Vector DBs
Databases & Tools: MySQL, MongoDB, Supabase, JDBC, Hibernate, Git
Testing Tools: Selenium WebDriver, Postman, REST Assured, Extent Reports

Education

NMAM Institute of Technology, Nitte 2023 – 2026
B.Tech, Information Science & Engineering
- GPA: 8.37

Experience

Cognizant Technology Solutions – *Quality Engineer Intern* 2026
- Automated web application tests using Java, Selenium, TestNG, and Cucumber (BDD).
- Tested REST APIs using Postman and REST Assured – verified responses, status codes, and error handling.
- Wrote Gherkin feature files to turn business requirements into clear, executable test scenarios.

Projects

Smart Database Management System *(RAG · Agentic AI · React · FastAPI · Gemini)*
- Built a conversational AI platform for natural language SQL queries using LLM-powered intent parsing, JWT auth, and RBAC across multiple databases.
- Designed a dual-agent Generate → Verify → Execute pipeline with AI guardrails; integrated Gemini AI for auto-generated charts and sanitised data summaries.

Coursera Automation Testing Framework *(Selenium · TestNG · Cucumber · Extent Reports)*
- Built a Selenium + TestNG automation framework for Coursera using the Page Object Model (POM).
- Added BDD layer with Cucumber – wrote Gherkin scenarios for login, course search, and enrolment flows.
- Configured Extent Reporter to generate HTML reports with pass/fail results and screenshots on failure.

Certifications

- **Prompt Engineering Foundation [101-BASICS]**, Cognizant Learning & Development, Mar 2026
- **Enterprise AI Transformation with Context Engineering [101-Basics]**, Cognizant Learning & Development, Mar 2026
